INTERNAL · FOR KIMLIEN

Call briefing: Thinh Phan

Phan's Custom Tailor · prepared by Yong, TheWebxite · 17 Oct 2026

Demo phans-custom-tailor-demo.vercel.app **Current site** tailormadesuit.net

THE 30-SECOND VERSION

- Thinh likes the demo and wants to talk about working together.
- Proposal: turn the demo into the official 3-language site, about **1 week** after we have all the information.
- Use **phanscustomtailor.com** (Phan's already owns it), no new domain; email unchanged.
- TWX handles hosting, security, backups and maintenance. Booking stays on the current **Koalendar**.
- Shop is **showcase only** in phase 1: customers message on WhatsApp/Zalo or book; no online payment yet.
- **No prices** on the call; Yong sends the quote afterwards. **Don't mention** the AI fitting room.

1 Context

- **Client:** Thinh Phan, co-founder of Phan's Custom Tailor, a bespoke tailor in a villa in Saigon Pearl, Binh Thanh. Many overseas customers: 4.8 on Tripadvisor (975 reviews), 4.9 on Google (1,115 reviews).
- **Us:** TheWebxite (TWX), a software and AI company in Malaysia run by Yong. Yong built the demo; Kimlien speaks with the client in Vietnamese.
- **Thinh's reply:** impressed by the demo; correctly guessed we used AI (Claude); is working with a separate **Web 3D** team; asked what kind of collaboration we have in mind.
- The demo is a preview: some products, photos and translations are placeholders.

2 Goals and running order

GOALS

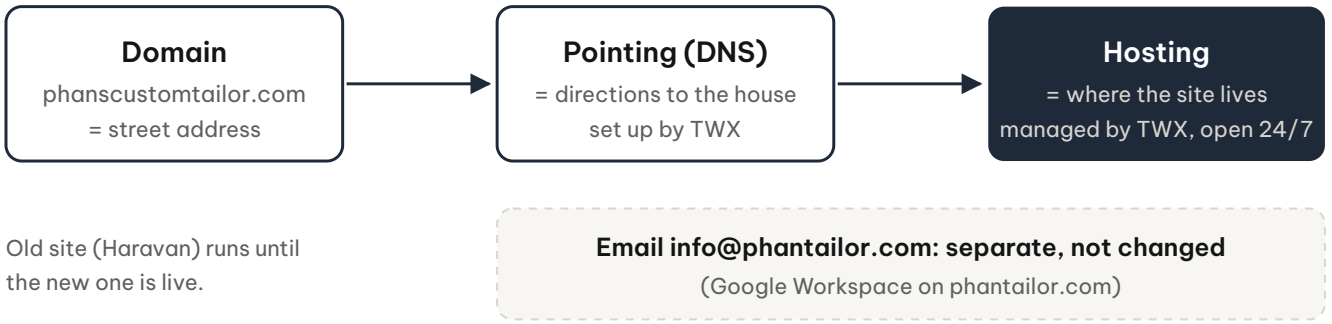

1. Understand what Thinh wants from the new site.
2. Agree the phase 1 scope (section 4).
3. Collect the information in section 7.
4. Say Yong will send a quote and timeline after the call.

SUGGESTED ORDER (ABOUT 30 MIN)

1. Thank him for replying; short intro to TWX.
2. Ask: his goals for the new site, his main customers, what he dislikes about the old site.
3. Present the proposal (section 4) and how we'd work with the 3D team.
4. Explain domain and hosting with the diagram in section 3.
5. Answer his questions (section 5).
6. Go through the information checklist (section 7).
7. Agree next steps: Yong sends the quote; he sends the information.

3 Plain-language explanations

Use this picture when explaining to Thinh:

Old site (Haravan) runs until the new one is live.

Email info@phantailor.com: separate, not changed
(Google Workspace on phantailor.com)

TERM	WHAT IT MEANS
Domain	The website's address, like a street address, e.g. phanscustomtailor.com. Paid yearly, owned by the business.
Hosting	The "house" the website lives in: the server that stores content and photos so the site is open 24/7. The domain is the address; hosting is the house at that address.
Pointing the domain (DNS)	Changing the directions so the address leads to the new house. We do it; we only need access to the domain account.
https (padlock)	The site is secure. Included, free.
Redirects	Old Google links lead to the matching new pages, so Phan's keeps its search ranking.
Haravan	The platform behind the old site (software and hosting in one). Keep it until the new site is live, then stop it.
Vercel	Where the demo runs: a global server network, fast in any country.
Koalendar	The booking tool Phan's already uses. The new site just links to it.
Payment gateway	A service for paying online by card or wallet. In Vietnam usually OnePay or VNPay. Only needed for online sales (phase 2).
Maintenance	After launch: monitoring, updates, backups, fixes and small content changes.

4 Our position (agreed with Yong)

1. **Phase 1 scope:** three-language site (English main, Vietnamese, Chinese); prices; process; fabrics; booking; WhatsApp and Zalo; showcase shop; old articles moved over; Google optimisation.
2. **Domain:** Phan's already owns **phanscustomtailor.com** (on Google Maps) and tailormadesuit.net. Suggest phanscustomtailor.com as main since it matches the brand; tailormadesuit.net forwards to it. No new domain needed. If he prefers tailormadesuit.net as main, that's fine too. The domain always stays in Phan's name.

3. **Hosting:** TWX handles everything: buying and managing hosting, security, backups, maintenance. Hosting and maintenance costs will be in the quote.
4. **Booking:** keep his Koalendar calendar; the site's booking buttons link to it. No new system; he manages his calendar as today.
5. **Shop:** phase 1 is showcase only. Customers browse cloth and ready-made pieces, then ask about price on WhatsApp/Zalo or book a visit. No cart, no login, no online payment.
6. **Why not sell online yet:** it needs someone handling orders daily, packing, international shipping, returns, and a payment gateway (OnePay, VNPay). For made-to-measure, customers still come to the villa to be measured, so a showcase is enough. Online sales can be phase 2.
7. **Customer accounts and cart** on the old site: not needed in phase 1 (the old shop has one product).
8. **Timeline:** about 1 week after we receive everything in section 7.
9. **Web 3D team:** complementary, not competing. The website is the main home; their 3D experience can go on a page or section inside it. We're happy to coordinate.
10. **Using AI:** be upfront. TWX is a software and AI company; AI makes us faster and better, but design, testing and support are done by real people.

5 Likely questions and suggested answers

QUESTION	SUGGESTED ANSWER
How much?	"Yong will send a detailed quote right after this call, based on what you choose today." No numbers.
Any monthly fee?	"Yes, hosting and maintenance; Yong will list it in the quote."
How long?	"About 1 week after you send all the photos and information."
Can we edit content ourselves?	"Just message us what to change and we update it under maintenance. If you'd like to edit it yourselves, we can discuss." Don't promise an admin panel.
Will it affect our Google ranking?	"No, old links forward to the new pages."
Will email be interrupted?	"No, info@phantailor.com stays as it is."
When do we stop Haravan?	"Once the new site runs smoothly; until then Haravan keeps working."
Who owns the domain?	"Always Phan's. We only need access to point it."
Can customers buy and pay online?	"Yes, but we suggest phase 2, since it needs someone handling orders and international shipping. In phase 1 customers browse, then message or book."
Is the AI fitting room on the demo included?	"It's a feature we're testing; we're still assessing cost and reliability, so it isn't in the proposal yet. Yong will follow up." Don't bring it up yourself.
What about the 3D team?	See section 4, point 9.
Where is TWX, how do you work?	"We're in Malaysia and work online via Zalo/WhatsApp and email; I support in Vietnamese."

QUESTION	SUGGESTED ANSWER
Who translated the Chinese?	“We did. You just need someone to read through the Vietnamese.”
A hard technical question	“I'll note it and Yong will answer in writing right after the call.”

6 Don't promise on the call

- ✕ A specific price.
- ✕ The AI fitting room.
- ✕ A self-edit admin panel.
- ✕ Online selling or payment in phase 1.
- ✕ A fixed launch date before we have all the information.
- ✕ Buying a new domain (Phan's already has one).

7 Information to collect (tick when received)

- [ ] Who manages phanscustomtailor.com and tailormadesuit.net, how to give us access (login account), and which address he wants as main.
- [ ] Real photos: villa, the founders, finished garments, cloth; original logo file.
- [ ] Missing prices: blazer, waistcoat, overcoat, women's garments; show VND, USD or another currency.
- [ ] Founding year (old site says “since 2013”), Tết and holiday closures, standard turnaround (5 working days?), and whether customers can reorder from abroad.
- [ ] Someone at Phan's to read through the Vietnamese.
- [ ] Koalendar link, official Facebook page (facebook.com/phanstailor or /phantailor), Google Business access.
- [ ] Main contact at Phan's and preferred channel (Zalo, WhatsApp, email).
- [ ] Contact for the Web 3D team, if he wants us to coordinate.

8 After the call, send Yong

- Which scope Thinh agreed to, and anything to add or remove.
- Which domain he chose as main.
- Any questions we couldn't answer.
- Which section 7 items we have, or when they'll come.
- When he'd like the quote.

Message Yong on WhatsApp if something urgent comes up during the call.

Appendix: the message Yong sent Thinh

Thinh has read this before the call. What we say should match it.

Hi Thinh,

This is Yong, Kimlien's friend, who made the website demo for Phan's. Thank you for taking the time to look at it and for such positive feedback. As you noticed, TheWebxite is a software and AI company: we use new-generation AI tools such as Claude in our design and development, combined with our experience building websites for international customers.

Before the call, here is a short summary so you can look through it in advance. Kimlien will speak with you directly in Vietnamese.

1. WHAT WE'RE PROPOSING
TheWebxite proposes turning the demo into Phan's official website:
• Three languages: English, Vietnamese, Chinese.
• Prices, the tailoring process, fabric information.
• Appointments through the Koalendar calendar you already use, plus WhatsApp and Zalo buttons.
• A showcase shop for Nobility cloth and ready-made pieces: customers browse, then ask about price on WhatsApp/Zalo or book a visit to the villa. No online payment needed at the start.
• Moving the articles over from the old website, and making Phan's easy to find on Google.

About the Web 3D project: the two fit together. The website is Phan's main "home" online, and the 3D experience can sit inside it, for example as its own page. We're happy to work with the 3D team.

2. DOMAIN AND HOSTING
• A domain is like a street address: customers type it to find Phan's. Phan's already owns phanscustomtailor.com (used on Google Maps) and tailormadesuit.net. We suggest phanscustomtailor.com as the main address because it matches the brand, with tailormadesuit.net forwarding to it automatically. So there's no need to buy a new domain.
• Hosting is the "house" the website lives in: where all the content and photos are stored so the site is open 24/7.
• The current site runs on Haravan. The new one will be hosted and managed by TheWebxite on a global server network, so it loads quickly for overseas customers and they can see everything before they travel to Saigon.
• We handle the technical side: security (https), backups, updates and maintenance. The domain stays in Phan's name.

3. WILL SWITCHING AFFECT ANYTHING?
• Customers typing the old address still reach the new website.
• Old links already on Google forward to the matching new pages, so no search traffic is lost.
• The email info@phantailor.com is not affected.
• The old website keeps running until the new one is ready; only then do you need to stop the Haravan plan.

4. INFORMATION WE NEED
• Domain: who manages phanscustomtailor.com and tailormadesuit.net (the login account), and which address you'd like as the main one.
• Photos: real photos of the villa, of you both, finished garments and cloth; the original logo file if you have it.
• Prices: blazer, waistcoat, overcoat and women's garments; show prices in VND only, or also USD or another currency.
• Content to confirm: founding year, Tết and holiday closures, turnaround time, and reorders after customers return home.
• Translation: someone at Phan's to read through the Vietnamese text.
• Accounts: the Koalendar booking link, the official Facebook page, and Google Business access (map and reviews).

5. NEXT STEPS
1) Call: agree on what you'd like us to do.
2) We send a quote and timeline.
3) You send the information in section 4.
4) We finish and test on computers and phones, about 1 week after receiving everything.
5) You approve the final version and the site goes live.
6) After launch: ongoing support, maintenance and updates.

On the call we can talk through anything you're interested in, including working with the Web 3D team. Please let me know what time suits you.

Thank you!
Yong – TheWebxite
